

# *Microbiology: A Human Perspective*

3<sup>rd</sup> edition, ©2001

McGraw-Hill

## **Contents**

### Part One: Life and Death of Microorganisms

- 1: Humans and the Microbial World
- 2: The Molecules of Life
- 3: Microscopy and Cell Structure
- 4: Dynamics of Prokaryotic Growth
- 5: Control of Microbial Growth
- 6: Metabolism: Fueling Cell Growth
- 7: The Blueprint of Life, from DNA to Protein
- 8: Bacterial Genetics
- 9: Biotechnology and Recombinant DNA

### Part Two: The Microbial World

- 10: Classification and Identification of Prokaryotes
- 11: The Diversity of Prokaryotic Organisms
- 12: The Eukaryotic Members of the Microbial World
- 13: Viruses of Bacteria
- 14: Viruses of Animals and Plants

### Part Three: Microorganisms and Humans

- 15: Nonspecific Immunity
- 16: Specific Immunity
- 17: Applications of Immune Responses
- 18: Immunologic Disorders
- 19: Host-Microbe Interactions
- 20: Epidemiology
- 21: Antimicrobial Medications

### Part Four: Infectious Diseases

- 22: Skin Infections
- 23: Respiratory System Infections
- 24: Alimentary System Infections
- 25: Genitourinary Infections
- 26: Nervous System Infections
- 27: Wound Infections
- 28: Blood and Lymphatic Infections
- 29: HIV Disease and Complications of Immunodeficiency

### Part Five: Applied Microbiology

- 30: Environmental Microbiology
- 31: Water and Waste Treatment
- 32: Food Microbiology
