### **Contents**

#### Part 1: Molecular Components of Cells

##### Chapter Listing:

1. Chemistry is the Logic of Biological Phenomena
2. Water: The Medium of Life
3. Thermodynamics of Biological Systems
4. Amino Acids and Polypeptides
5. Proteins: Secondary, Tertiary, and Quaternary Structure
6. Lipids, Membranes, and Transport
7. Carbohydrates and Cell Surfaces
8. Nucleotides and Nucleic Acids
9. Recombinant DNA: Cloning and Creation of Chimeric Genes

#### Part 2: Protein Dynamics

10. Enzymes: Their Kinetics, Specificity, and Regulation
11. Mechanisms of Enzyme Action
12. Proteins of the Blood
13. Molecular Motors

#### Part 3: Metabolism and Its Regulation

14. The Organization of Metabolism
15. Glycolysis
16. The Tricarboxylic Acid Cycle
17. Electron Transport and Oxidative Phosphorylation
18. Photosynthesis
19. Gluconeogenesis, Glycogen Metabolism, and the Pentose Phosphate Pathway
20. Lipid Metabolism
21. Amino Acid and Nucleotide Metabolism
22. Metabolic Integration and Organ Specialization

#### Part 4: Information Transfer

23. DNA: Replication, Recombination, and Repair
24. Transcription and the Regulation of Gene Expression
25. Protein Synthesis and Degradation
26. Signal Transduction: The Relay of Metabolic and Environmental Information
